Oskari Kaipainen

Profile

Master's student in Software and Service Engineering at Aalto University with a strong passion for designing, developing and managing professional software solutions. I have a strong understanding of many programming languages and I enjoy working in multidisciplinary teams solving complex problems. Driven by curiosity and a commitment to continuous learning, I am eager to contribute to innovative projects and grow as a professional in the dynamic world of technology.

Education

Master's in Science and Technology

Sep 2024 - Present

Aalto University, Otaniemi

Currently studying for my master's degree, majoring in Software and Service Engineering. My minor is in Machine Learning, Data Science and Artificial Intelligence.

Bachelor's in Science and Technology

Sep 2021 - Jun 2024

Aalto University, Otaniemi

Graduated with a bachelor's degree in 2024. Minored in Industrial Engineering and Management.

Upper Secondary School

Aug 2016 - Jun 2019

Apollo Secondary School, Helsinki

Received a scholarship from ABB Oy for most gifted third-year math and physics student.

Employment

Software Developer

Sep 2024 - Present

Bonwal Oy, Helsinki

Continuing as a Software Developer at Bonwal alongside my studies, with a focus on taking greater responsibility in modernizing the company's DevOps practices.

Software Developer Intern

May 2024 - Aug 2024

Bonwal Oy, Helsinki

Software Developer Intern (Summer) with a focus on front-end development for several React Native mobile applications. Led the implementation of automated testing across multiple project with Robot Framework.

Course Assistant

Feb 2024 - May 2024

Aalto University, Otaniemi

Serving my second year as a Course Assistant for CS-A1120 - Programming 2, continuing to support students and assist in course delivery.

Course Assistant

Feb 2023 - Jun 2023

Aalto University, Otaniemi

Course Assistant for CS-A1120 - Programming 2, where I facilitated English-language workshops to support students with Scala programming exercises and address various technical challenges.
